Inside the troubled singer's
battle for her little angels

Ask the expert

Celebrity dermatologist and author of the book *10 Minutes 10 Years*, Dr. Fredric Brandt, talks skin sense

Q I've heard about the laser facial. How does this benefit the skin? What kind of maintenance is required?

A Isolaz! It cleans out pores and improves your acne immediately. Intense pulse light kills the bacteria in the skin and helps even out skin tone. I recommend three treatments, two to four weeks apart, and then a repeat treatment every three months.
